

Discussion Group

Notes by Leonardo Da Vinci

15/11/06

EGO.

We await a time of greater enlightenment. This time is coming during the current period of humanities growth. Major shifts of consciousness reflect the energies being given by the Spiritual Hierarchy to raise mass consciousness.

This Goddess Awareness discussion group has two purposes, to awaken the masses by self awareness and growth, and to take the sting out of shifting for the masses, by each one of you allowing your own self awareness to grow, to magnify out the sum total of your experiences.

You, each one of you represent an aspect of humanity at one point or another. There are value judgements and those restricted views which come to the surface to hold you back, such as lower self or ego issues. The ego is a very mysterious thing, one because it wakes so easily - needing to be stroked, to pull energies towards itself, often at the expense of others.

Tonight's discussion, and it is very relevant to the subject matter, is how do you look at this, at your own ego issues with our help, and you will need to be very very brave to do so. Ego does have a great deal to do with societal beliefs, individual pathways, and the ability to hold others down, or suppress their power or light to increase your own. For this reason we will set a series of questions. We ask that each one in turn to answer, and we ask you not to censure what you feel others should know about you.

This is one of the most troublesome of all aspects of human nature. Where ego takes personal confidence to extremes, and not only corrupts facts, but actually manipulates energies and others energy to empower the self. How is this relevant, because it is across the board so to speak. All of humanity suffer from some form of ego interplay. With some it is in a manipulation of energy to gain approval. To be seen as all knowing, all powerful, beautiful, wonderful and perfect, and yet behind the obvious is but a different story.

This discussion group will try you. For your ability to speak truth fully will be the force which helps strip away negative mass consciousness which limits humanity as a whole. All have some form of ego issues. Throughout history nations have been founded, belief systems also, upon the corrupted views of those who hand down knowledge, and it is no different today.

It takes an extremely balanced and honest soul to see, yet alone speak of issues and how ego effects your beliefs. Do you see? Until you look at ego honestly and

allow truth to come forward, you are still carrying around a mask, the false image, false illusion that which needs to be lifted from all people. . . so truth and only truth is present.

I was a seeker of truth, and still am. I am concerned with the lack of truth between individuals and between nations . . . all with agendas, personal points of view to put forward. That takes strength, courage, and ability to be truthful in honest self reflection. This will in turn aid you and others who read these findings. To see where they also strip away others power, and often impose abusive power upon others by way of dishonesty with self.

So the first place to start any reflection and cleansing process of the whole is to look within.

Please see this as entirely necessary. Beliefs are the accumulated stories, tales and handed on information from one person to another, and all unless already clear, corrupt to some degree the personal truth of another, from the original simple loving words, of Christ, of Buddha, Mohammed and other great noble souls who found their own clarity and purity. And what made them pure was an absence of ego issues to cloud their teachings.

If you as a core group looking at a problem are to find clarity, perhaps firstly you need to look at personal ego issues and where they take you. . . Look, be honest and allow your words of honest appraisal to flow. Answer the questions honestly, without the mask you wear to have others see you as wonderful, perfect, or all knowing, and this will be not only painful for some of you, but be the most critically important point you could discuss.

Until the false illusions are stripped away you will not know each other as God, and as aspect of God.

Truth shall set you free, but also humanity, a humanity that is built upon illusion after illusion, corrupted truths by ego out of control. All have ego, it just depends upon how this is faced within that real progress is made.

Christ had his ego in check, so also the other great avatars and world teachers. Many dictators throughout history attached their own poisoned thinking into what is a very confused mass consciousness.

To bring clarity to this research, to find the original essence of love given by a very loving God, you will need to reflect upon this question, make it yours, and use it everyday to see if you try to impress others with your knowledge, or for public approval, or to manipulate others so you can achieve a state of superiority. . . for all are equal, all loved, and all have their story.

But let us talk, imagine a world where illusions, false masks are removed, and

honest, truly honest conversations take place. Where no manipulation of truths or energy takes place. This would be peace at its core. It would be a place where all feel comfortable to be all they can be. Without the corruption of egos causing lies to be between you.

This topic is highly combative , because often the illusion created of perfection and power is really a disguise covering energies not so pure.

Growth cannot come for the whole or for yourselves until this is tackled. . . perhaps the most prickly topic of them all.

Remember love is truth in reality, for no illusion exists in pure love, unconditional it is and so very powerful. Should you not then seek a structured path as magnificent beings of life? Look at Buddha, did he achieve all he did by just sitting and meditating. No, he looked within and saw that what was endemic in all people was the first place to start with personal growth.

This then is the reality. You cannot love another without truly loving the self, but not with ego blown false images of perfection, no!

It will be an interesting topic, for it has some very important aspects which apply to the whole mass consciousness. Expect the best, but look within, and see what is separating you from truth. . . . Personal barriers placed so others can only see the illusion you wish them to see, this is the reality.

When faced with my own reflection how do I feel?

If given a gift, what is my reaction?

How do you perceive how others see you?

Does this really matter?

If given a choice between personal growth and public image, which would you choose and why?

If I am but part of God, why am I so afraid to show who I really am . . . fear of rejection?

If appointed to a job, do you have to minimise others to establish your territory?

Look at these questions, discuss them please honestly, and restructure who you are in light of what you see as your impact upon the negative mass consciousness, and be aware ego can be used also to disempower as to

empower by manipulation of others truths.

Be cautious you do not come from lower energies. Keep the heart open and establish real, clear, truthful lines of communication, then all of humanity benefit. Daily watch your words, thoughts and attitudes. How much of what you do is to impress others with your skills, knowledge, beauty, strength,

Where is that clear line reached where there is no protection needed?

It is in shedding false masks, illusions that you will find a clear state where God resides, and then and only then you can see others as God, not through the tinted lens of ego! Cast out that which no longer serves you. I am Leonardo Da Vinci. I thank you so for so receiving me.

Express the best, bless the rest.
